HOW TO PROMOTE THE ONLINE SALES CHANNEL OUTSIDE THE MARKETPLACES: DIGITAL MARKETING BASICS

“THE VALLEY IS THE HUB WHERE KNOWLEDGE BECOMES THE DRIVER THAT TRANSFORMS”

5. HOW TO PROMOTE THE ONLINE SALES CHANNEL OUTSIDE THE MARKETPLACES: DIGITAL MARKETING BASICS

In this section the various strategies and tools for an adequate promotion of the online store will be analyzed. The Internet has become an obligatory channel in any action, both for its possibilities of interaction and for its international coverage. Even in its early stages, online marketing offers a wide range of variants and possibilities that move at the same speed as the network itself. Many of its terms, currently widely accepted, were simply unknown 5 years ago.

- ✓ Basic concepts: SEO/SEM/SMO...
- ✓ Main metrics of online marketing : CPM/CPC/CPL/CPA.
- ✓ Engine search optimization : what to do to be on the “golden mile”.
- ✓ Planification, execution and campaign tracking SEM.
- ✓ Google Adwords campaign example.
- ✓ Email marketing actions.
- ✓ Affiliate programs : typology and recommendations.
- ✓ The control of online reputation as an element of capturing leads and as a competitive intelligence tool .
- ✓ Use of social media in online marketing strategy (SMO): the role of community manager .
- ✓ Social Commerce: current status, forms of implementation and new trends.
- ✓ New media powered by social media : “influencers’ marketing ”. Some examples.
- ✓ *Application examples in the agro-food sector*

SEO, an acronym for Search Engine Optimization -in Spanish search engine optimization-, are the set of actions and techniques that are used to improve the positioning (visibility) in search engines of a website on the Internet, within the organic results in search engines such as Google, Bing or Yahoo.

Tips and tricks

Search engines collect the list of pages on the web and order it based on their algorithm. These algorithms are updated from time to time to try to offer the user the results that best match the search they have made and that among the top of the list there is no manipulated text or spam.

Search engines rely on more than 200 factors to position a web page. These factors can be internal or external. The external ones would be those that cannot be controlled and that depend mainly on the behavior that users have on that website:

- Whether or not it is a site that is shared on social networks
- Number of quality links you have linked
- The number of visits you receive
- Bounce rate
- ...

The **internal** ones are those that do depend on the person in charge of the web:

- Charging speed
- Domain authority
- The publication of quality content that corresponds to the keywords
- The architecture or structure of the web
- The HTML code
- Write the URLs with the necessary information
- ...

SEO techniques and strategies to position a website in the first positions:

The content.

The content must provide an answer to the user's search, but searches are not always very specific. Searching for 'restaurant in Madrid' is not the same as searching for 'Italian restaurant in Madrid in the Chamberí area that opens at night'. To be indexed by search engine robots, websites have to offer clear content that includes several keywords..

THE MOST COMMON SEO TIPS

by 30+ SEO experts

SEO techniques and strategies to position a website in the first positions:

Mobile search optimization.

Search engines like Google give preference to those pages that are Mobile Friendly or that are based on the characteristics of the responsive web; that is, they offer the best response regardless of the device from which the query is made.

Mobile Friendly sites are those that use text so that it is readable on a mobile without using the zoom and that it is not necessary to scroll horizontally to read it, those that place links with enough distance from each other so that the user can touch the correct one, and those who avoid software that are not common on mobile devices, such as Flash.

SEO techniques and strategies to position a website in the first positions:

Site speed.

A page that takes more than five seconds to load causes a high number of bounces.

The factors that most influence the loading speed of a website are: Hosting, which is where the server is located, the network and programming.

SEO techniques and strategies to position a website in the first positions:

HTML.

There are a series of meta tags that favor SEO, and, for this, the HTML must be validated, that is, it must meet the standards of the World Wide Web Consortium. The first two **meta tags** are the ones that provide the information that search engines use to display in their search results:

Title tag: After the page content itself, the Title tag is the second most important piece of content on a page. It is the first piece of code that the search engine reads when it arrives at the web page. It will also be the title that is displayed when sharing the content on social networks and, generally, the title that search engines show in their search results.

H1 tag: acts as a second Title tag and corresponds to the description that usually appears below the title.

SEO techniques and strategies to position a website in the first positions:

Presence in Social Networks.

An active presence on social media helps us reach all of our users, as we don't all use the same sites or apps to search. But, in addition, there are certain actions that search engines take into account, such as the number of times a page is shared on Facebook or the 'likes' it has, the number of tweets from an account or the authority of the account. Twitter.

The screenshot shows a social media monitoring dashboard with a blue header bar containing navigation tabs: Feed, Dashboards, Influencers, Insights Center, Reports, and a user profile for Eva Smith. A red arrow points to the 'NASA (Demo)' alert in the 'Mentions' section on the left sidebar. The main content area displays a list of alerts under the heading 'All Sources'. The first alert is from @NASA, mentioning 'Mars' and 'Hargraves Crater'. The second alert is also from @NASA, mentioning 'Mars'. The third alert is from india.com, mentioning 'Mars' and 'Song Composed by Mum...'. The fourth alert is from @WilleCam, mentioning 'Mars' and 'Space'. The fifth alert is from blog.grantadesign.com, mentioning 'Mars'. On the right, a detailed view of the first alert is shown, featuring a NASA tweet about the collision that created Mars' Hargraves Crater, with a link to a NASA website and a Twitter image of the crater.

WHAT IS SEM?

... although the truth is that its definition could include all those marketing actions that take place within a search engine, whether or not they are paid.

SEO vs SEM

Sustained Value

Trustworthiness

Cost

Quick Results

Better Data

Test-able Experiences

THE SIMILARITIES

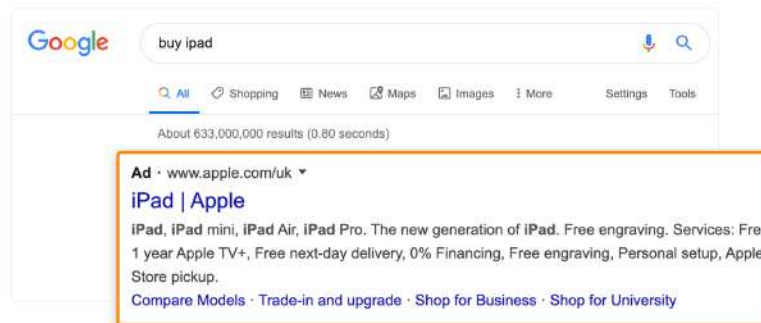

Both SEM and SEO ...

- Help your brand appear in search results
- Drive more traffic to your website
- Require knowing your audience
- Use keyword research to uncover popular search terms
- Target specific keywords
- Require testing and continuous optimization

| DIFFERENCES | SEM | SEO |
|-------------------------|---|--|
| Search Results | Include "Ad" designation and have ad extensions | Appear as organic results and have featured snippets |
| Cost | Pay each time user clicks | Pay nothing |
| Visibility | Shown to select targeted audience | Shown to anyone |
| Results | Are immediate | Take time |
| Good for testing | ✓ | X |
| Provide value over time | X | ✓ |
| Click-through rate | Lower | Higher |

Some of the benefits that Search Engine Marketing can bring to your brand:

- Get highly qualified traffic to your page
- Make your brand or company known to the whole world
- Generate conversions
- Go far on a tight budget
- Contextual advertising

<https://www.youtube.com/watch?v=CEpcMPyjX4s>

WHAT IS SMO?

SMO, or **Social Media Optimization**, is a concept whose main idea is to use social networks to expand the digital presence of a brand and improve the performance of its positioning strategy, based on optimizations that make Social Media channels have the optimal performance to meet your objectives.

CPM is a digital marketing term that stands for **Cost Per Thousand**.

CPM measures the cost of an online ad per **1,000** impressions.

An impression is when the ad is displayed on a web page.

CPM is commonly used in **bidding systems**.

These systems use CPM to indicate **how much the ad will cost per thousand people exposed**.

For example, if a CPM price is set to \$3.00, the advertiser must pay \$3.00 for every thousand impressions on their ad.

Cost Per Thousand (CPM) Formula

How to calculate the amount paid by advertisers for 1,000 impressions

$$\text{CPM} = \left(\frac{\text{Total Amount Spent}}{\text{Total Measured Impressions}} \right) \times 1000$$

(Cost Per Thousand)

Cost per click (CPC) is a measure for paid media campaigns that indicates the cost per click on your ad. It tells you how much an online ad format is worth investing in.

Cost Per Click (CPC) Formula

Calculate how much each click costs.

$$\text{CPC} = \left(\frac{\text{Total Amount Spent}}{\text{Total Measured Clicks}} \right)$$

(Cost Per Click)

What does it mean?

Total Amount Spent: The total amount of money used on a marketing activity (eg running an ad campaign).

Total Measured Clicks: The total number of times a click occurred (and was counted by a server).

theonlineadvertisingguide.com

TO
AG

YOUR PRICE = THE AD RANK OF THE PERSON BELOW YOU / YOUR QUALITY SCORE + \$0.01

| | MAX BID | QUALITY SCORE | AD RANK | ACTUAL CPC |
|--------------|---|--|---------|---|
| ADVERTISER 1 | \$2.00  | 10  | 20 | $16/10 + \$0.01 =$ \$1.61  |
| ADVERTISER 2 | \$4.00   | 4  | 16 | $12/4 + \$0.01 =$ \$3.01   |
| ADVERTISER 3 | \$6.00    | 2  | 12 | $8/2 + \$0.01 =$ \$4.01    |
| ADVERTISER 4 | \$8.00     | 1  | 8 | HIGHEST CPC     |

Note: Orange arrows in the Quality Score column point from Advertiser 1 to Advertiser 4, indicating the ranking order.

The CPL (Cost Per Lead) is the cost of capturing **each lead** (or potential customer). Within Affiliate Marketing we could say that it is **the price set for each potential client that we get from a company**, either by registering on its website, filling out a form, etc.

Cost Per Lead (CPL) Formula

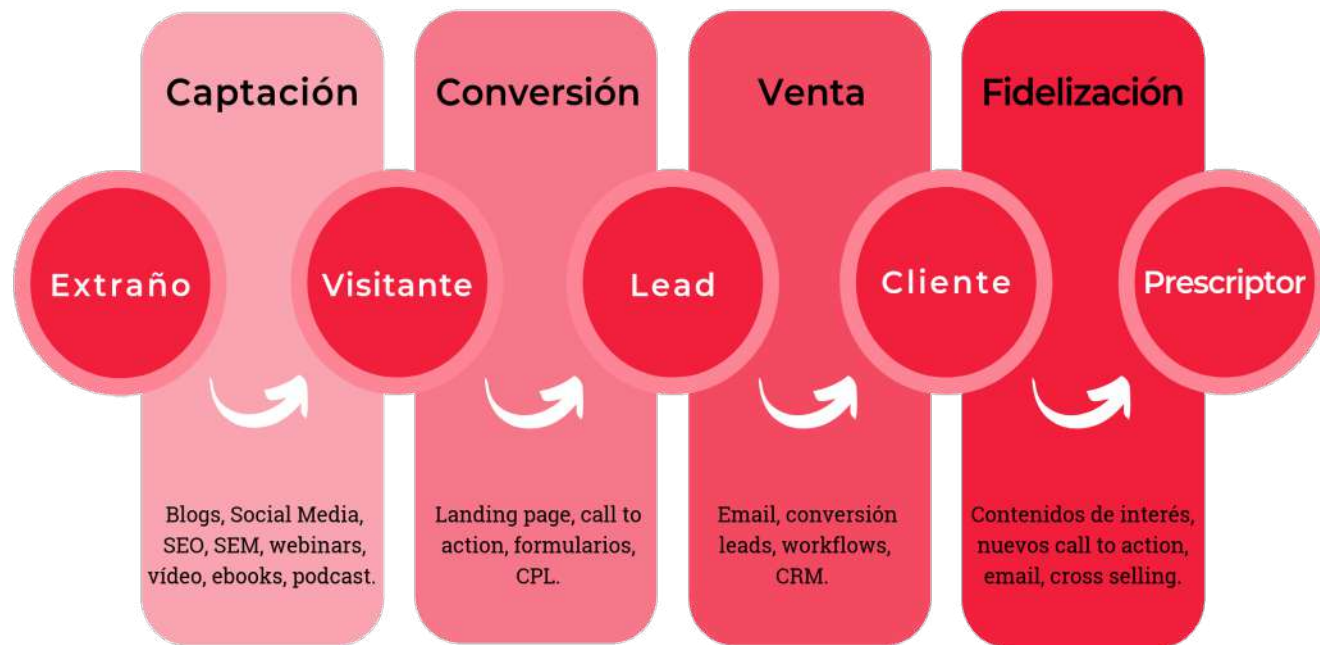

Calculate how much each lead costs.

$$\text{CPL (Cost Per Lead)} = \left(\frac{\text{Total Amount Spent}}{\text{Total Attributed Leads}} \right)$$

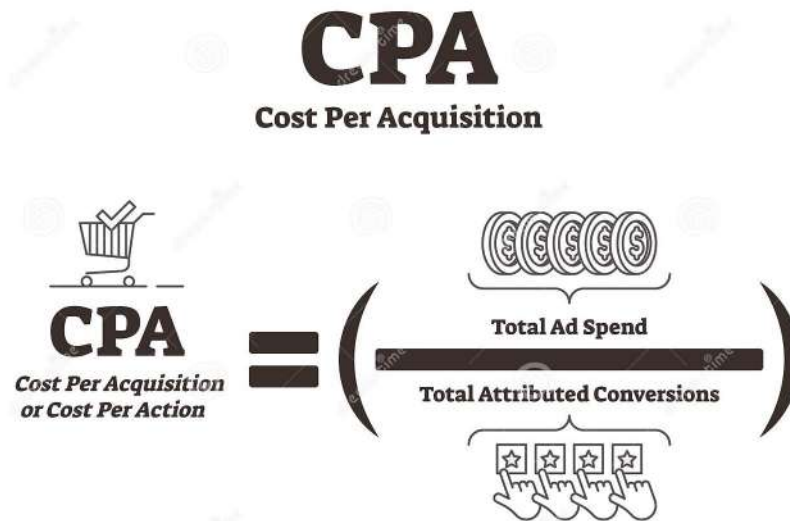

What does it mean?
Total Amount Spent: The total amount of money used on a marketing activity (eg running an ad campaign).
Lead: The contact details of a potential customer.
Total Attributed Leads: The total number of leads what were attributed to this marketing activity. Leads are type of conversion, and so can have multiple causes (eg someone seeing an ad in two different places before going to a website and filling in a newsletter signup form). Due to this advertisers often need to attribute each lead to a cause manually.

theonlineadvertisingguide.com **TO AG**

MAIN METRICS OF ONLINE MARKETING: CPL

The **CPA** or **Cost Per Acquisition** is a payment method used within the field of online advertising in which the advertiser **only pays if the user makes a purchase through an ad**. That is, the advertising company will only have to pay for that ad if it is finally effective and the purchase is carried out.

$$\begin{array}{c}
 \text{CPA} \\
 \text{Cost Per Acquisition} \\
 \text{or Cost Per Action}
 \end{array}
 =
 \left(\frac{\text{Total Ad Spend}}{\text{Total Attributed Conversions}} \right)$$

MAIN METRICS OF ONLINE MARKETING : CPM, CPC, CPL, CPA.

EMBUDO DE CONVERSIÓN

CPM

Coste por 1.000 impresiones.
Cantidad de veces que se muestra un anuncio, Ej: 5 euros al CPC,
30.000 impresiones -> coste 150€.

CPC

Coste por clic.
Sólo se paga por los clics que se hacen en anuncios. Objetivo, captar tráfico.

CPL

Paso previo a convertirse en cliente.
Se calcula en función de la cantidad de datos.
Información dejada por el cliente potencial.

CPA

Coste que se paga por una venta realizada.
Sólo se paga por cada acción convertida de usuario.

Impresiones

Clics y destino landing

Leads

Transacciones

www.palentino.es

Otros indicadores:

CPI - Coste por instalación (software, app, juego ...)

CTR - Click Through Rate (proporción). Muestra la frecuencia con la que los usuarios que ven publicidad online, acaban pulsando sobre los enlaces que se muestran. Para obtener el porcentaje de clics se divide el número de usuarios que han pulsando entre el número de visualizaciones del anuncio.

Being on the “golden mile”, that is, at the top of Internet searches/results, continues to be a key activity within a digital marketing plan.

In summary, in order to be at the top of the results list, it is important to remember:

- Take care of the structure of the web (design, usability, distribution)
- Present original content that adds value to the user and differentiates itself from the competition.
- Obtain a good digital reputation and recommendations among users.

First of all, we will analyze in which **search engine** we want to carry out the campaigns. The search engine par excellence is **Google**, but we can also run campaigns on other search engines such as Bing, Yahoo or Yandex, the latter being very popular in the Russian market.

Once we are clear about the search engines in which we want to carry out campaigns, we will select the type of campaigns that we want to carry out in accordance with our business objectives (notoriety, branding, sales, etc.).

For example, if we focus on the ads that we can make within the Google network, which is the one that undoubtedly offers the most possibilities, we have the following types of campaigns:

- **Ads within the Search Network:** we can show text ads
- **Ads on the Display Network:** we can show text ads as well as banners with creatives.
- **Ads with Display selection:** unifies the two previous points but for the display network.
- **Ads on the Shopping platform:** it is a specific format for online product stores since the products are shown directly in the search engine with an image, price, as well as the direct link to make the purchase.
- **Video ads on the YouTube platform:** videos in ad format that are shown between videos or before videos on the platform are played.
- **Ads to advertise Apps:** to promote applications within Android users.

HOW TO ORGANIZE A SEM CAMPAIGN

<https://www.youtube.com/watch?v=CEpcMPyX4s>

WHAT IS GOOGLE ADWORDS?

It is an online program (free), which Google makes available to us, to carry out advertising campaigns on the Internet. It is a very complete tool and hides many possibilities to help us optimize our SEM campaign. You only need to have a Google account to access the tool.

How does Google AdWords work?

What happens when you enter a query into Google?

Google looks up the keywords AdWords advertisers bid on

| Keywords | CPC | Quality Score |
|---------------------|-----|---------------|
| a search query | 2 | 10 |
| just a search query | 1,5 | 7 |

| Keywords | CPC | Quality Score |
|----------------------|-----|---------------|
| another search query | 2 | 9 |
| just a search query | 1,5 | 7 |

| Keywords | CPC | Quality Score |
|------------------|-----|---------------|
| a search query | 3 | 8 |
| any search query | 2 | 6 |

Adrank Calculation

$$\text{max. CPC} \times \text{Qualityscore} = \text{Adrank}$$

How does the auction system actually work?

There is a difference between your max. CPC and your actual CPC!

The actual CPC paid for a click differs from the max. CPC. Basically it's calculated by the AdRank from the advertiser in the lower position divided by the quality score.

$$\text{actual CPC} = \text{Competitors AdRank} / \text{Your Quality Score}$$

Joe pays 2.5 for a click. To calculate this Google takes Billy's AdRank of 20 and divides that by Joe's Quality score of 8. $20 / 8$ equals 2.5!

It's not quite clear how the minimum price is calculated, we're quite sure that Quality Score, historical CTR of the keyword / Display URL and max. CPC play a role in the calculation.

It's not quite clear how the minimum price is calculated, we're quite sure that Quality Score, historical CTR of the keyword / Display URL and max. CPC play a role in the calculation.

| | max CPC | Quality Score | AdRank | actual CPC |
|-------|---------|---------------|--------|-----------------|
| JOE | 3 | 8 | 24 | $(20/8) = 2.5$ |
| BILLY | 2 | 10 | 20 | $(18/10) = 1.8$ |
| TIMMY | 2 | 9 | 18 | min. Bid |

Let's say Joe raises the quality Score from 8 to 10. So he still stays on position #1 but pays 20% less for the click!

$$\text{Billy's AdRank} / \text{Quality Score} = \text{actual CPC}$$

$$(20/10) = 2$$

That's 20% less costs!

Why does that matter or Why should I care?

Understanding how the auction works can save a lot of money!

Raising your Quality Score lowers not only your costs but also improves your ad positions!

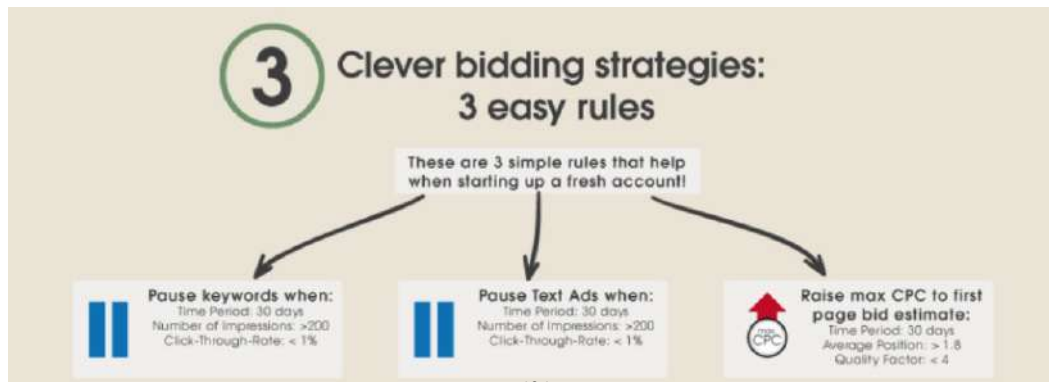

So finally the Google Search Results Page (SERP) will look like this:

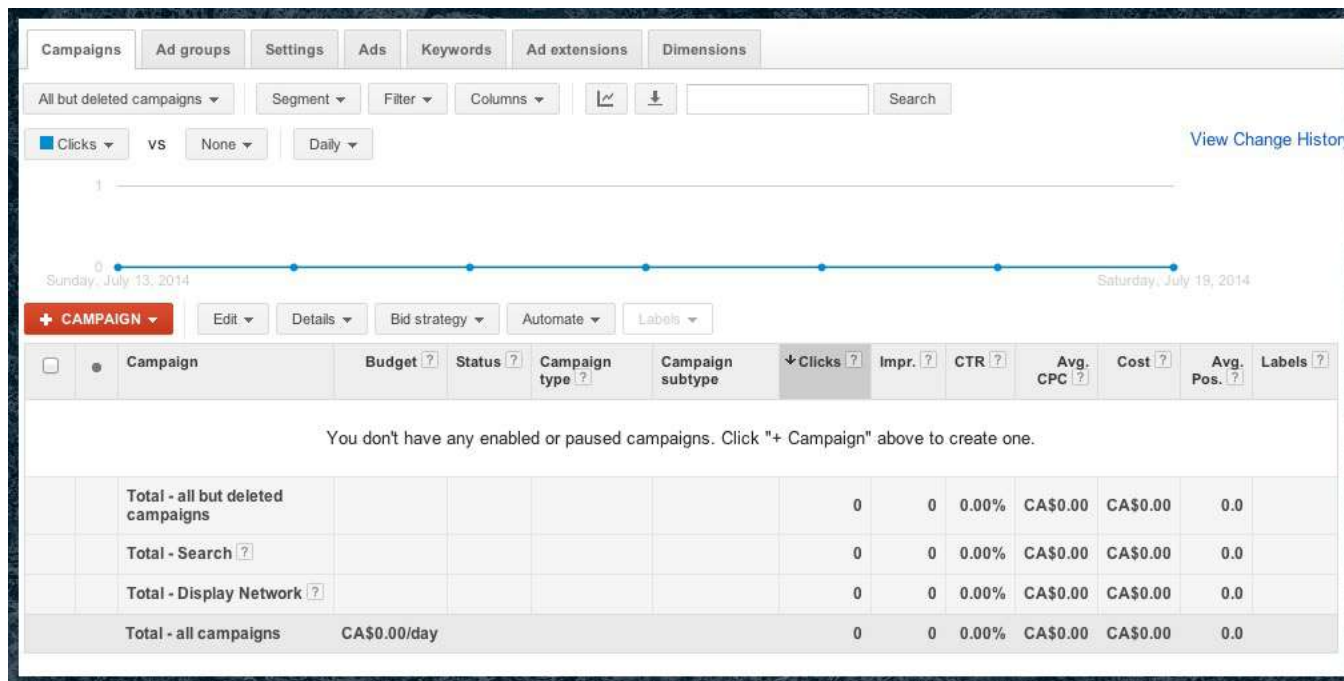

Sometimes the SERPS look a bit different: These are the Ad Extensions!

CREATING STORES

An example of a Store created
in Amazon Spain:

A+ CONTENT CREATION

For all products uploaded under a registered trademark, Amazon allows you the possibility of increasing the information displayed, through what is called A+ Content.

In the Seller Central section “Ads-Content Manager A+” we can manage and propose to Amazon the content we want to show. We must select the product for which we want to create the A+ content and start creating it through the selection of a series of modules, which combine text with images.

An example of A+ Content, active on Amazon:

Farala #behappy Woman

Eau de Toilette 100ml

Alegre, alocada y explosiva, Farala #behappy siempre está buscando nuevas emociones. En su mundo infinito solo hay lugar para la curiosidad y la felicidad. Su espíritu de libertad encarna la juventud desenfadada y con ganas de expresar al máximo cada minuto de su vida.

Floral Especiada

Sus expresivas notas de rosa y jengibre en la salida se entrelazan en el corazón de esta fragancia con la fuerza del nardo y el alegre jazmín en flor, creando un aromático mundo casi mágico. En su fondo descansan notas a pachuli y almizcle que contagia todo a su alrededor.

3. SEND A BUYING GUIDE

Let's get your new business idea off the ground  

To: John Doe 

1:43 PM (1 minute ago)   

Hi John,

From choosing a unique name, to setting up a website, to getting properly registered, there's a lot that can get in the way of starting a new business. Having worked with many aspiring entrepreneurs like yourself, I understand the frustrations but also have been able to gain insight into what works.

In the attached guide, [How to Turn Your Business Idea into a Reality](#), you'll learn:

- How to break down common barriers to getting a business off the ground.
- What you can do yourself and what you should hire a pro to do.
- Eye-opening stats about new businesses to inspire and inform you.

If you would like to talk in more detail about starting your business, I'd be happy to talk on the phone. You can click below to schedule a phone consult for a time that works for you.

[Book a free consult now](#)

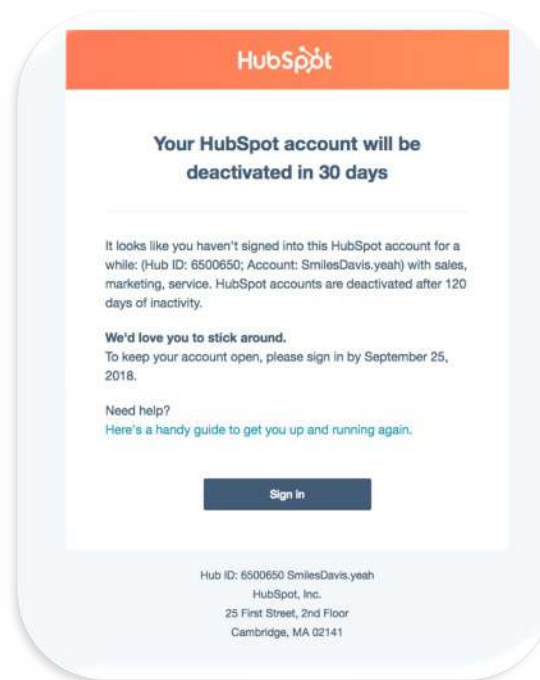

Keep up the hard work!

Sincerely,

Jane Doe

WHAT IS AFFILIATE MARKETING?

They are strategies that allow us to open new channels to **increase sales using resources outside the company.**

HOW IT WORKS:

SOFTWARE TO CREATE OUR OWN AFFILIATE NETWORK

<https://www.youtube.com/watch?v=9cysrZC4NSI>

ADVANTAGES:

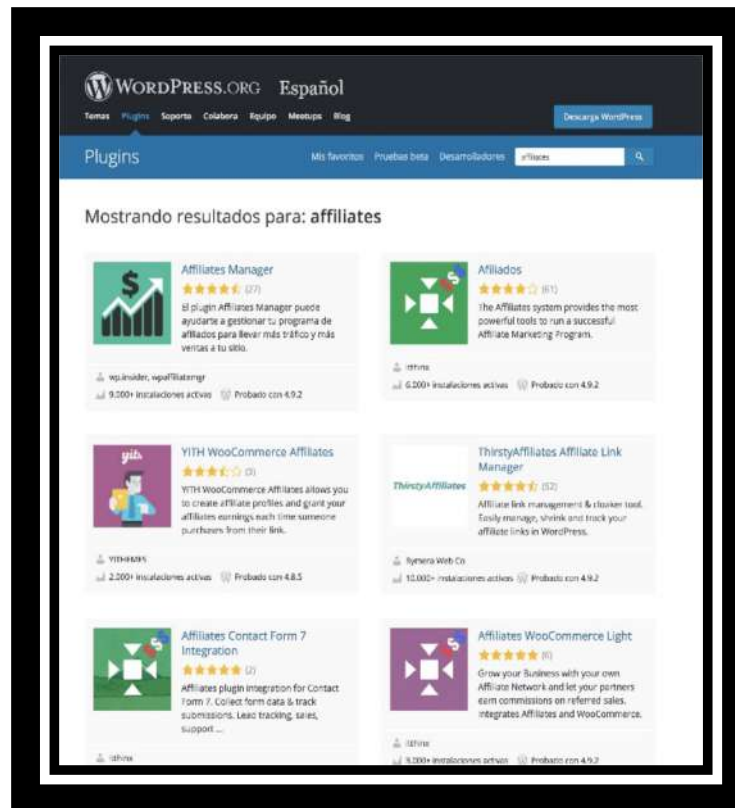

- . Traffic increase
- . Greater range
- . You pay for goals
- . Semi-automated process

DISADVANTAGES:

- . The margin is reduced
- . There is no full control of the message
- . Affiliates / Competitors

SOFTWARE FOR WORDPRESS:

AffiliateWP is not only particularly easy to use, but also has a great set of features and a range of useful extensions, it has been built to **integrate seamlessly with WooCommerce**. If you're already familiar with WooCommerce admin pages, then getting started with AffiliateWP shouldn't be a problem at all.

It is one of the largest platforms where you can find programs with countless themes from all sectors.

It has affiliate programs for example solutions for online stores, b2b advertising, domain registration, hosting, tools for social networks, wordpress templates and tools for monitoring clicks on links.

THE CONTROL OF ONLINE REPUTATION AS AN ELEMENT OF CAPTURING LEADS AND AS A COMPETITIVE INTELLIGENCE TOOL .

THE CONTROL OF ONLINE REPUTATION AS AN ELEMENT OF CAPTURING LEADS AND AS A COMPETITIVE INTELLIGENCE TOOL .

The Community Manager is a digital marketing professional responsible for the management and development of the online community of a brand or company in the digital world.

The **Community Manager** must add value in the following 4 areas:

- **Content creation** and management.
- **Analytics.** Monitoring of all strategic parameters and definition of KPIs (Key Performance Indicators): community growth, ROI (Return of Investment), social web traffic...
- **Communication with the community.** Establish two-way dialogues, create audiences, humanize the brand and generate value. At this point, customer service comes into play. Social Networks are a perfect setting for this.
- **Planning** of digital marketing actions.

The Online Community Manager “A Jack Of All Trades”

Social commerce or social commerce is a form of online commerce that uses social networks as another sales channel, both for products and services.

The profiles on social networks that your brand has are an excellent setting in which you attract potential clients and in which you have the opportunity to generate the necessary trust that every sale needs.

THE CONCEPT OF “SOCIAL COMMERCE”

US Retail Social Commerce Sales, 2018-2022 billions and % change

THE CONCEPT OF “SOCIAL COMMERCE”

US Retail Social Commerce Sales, 2019-2025

billions and % change

Note: includes products or services ordered via social networks (such as Facebook, Instagram, Pinterest, WeChat, Line, VK, and others) regardless of the method of payment or fulfillment; excludes travel and event tickets, tips, subscriptions, payments, such as bill pay, taxes or money transfers, food services and drinking place sales, gambling and other vice goods sales

ADVANTAGES OF “SOCIAL COMMERCE”

- You generate greater **trust** between your community and your potential clients, due to the recommendations that others make of you.
- Due to what we just said, your **reputation** increases. And that feeds confidence and boosts sales.
- Improve **engagement** on your social profiles, which makes you more **visible** on social networks.
- Even if you don't do direct sales social commerce, you **push** the sales of the products or services on your **website**.
- It **differentiates** you from the competition, since most brands still do not have a defined strategy on this issue.

Influencer marketing is a new marketing **strategy** that consists of achieving a series of collaborative links between **brands** and companies and those **people with great visibility** and prominence on the internet, who are known as 'influencers'.

HOW EFFECTIVE IS INFLUENCER MARKETING?

The main benefits of using influencer marketing techniques are as follows:

- The **positive** messages of our brand or company are amplified.
- A lot of **conversation** is generated on the network about our products or services: awareness
- **Traffic** to our website or the landing page of our campaign is increased.
- Influencers are closely followed by a target audience with a great **purchasing power** and who are very consumerist: the **millennial** generation.
- If designed well, an influencer campaign doesn't have to be very expensive, and a satisfying and profitable return on investment (ROI) can be achieved.
- The brand gains **reputation** and prestige

To design a good influencer marketing strategy...

1. **Identify** the most relevant influencers and, above all, those who best fit our products and the values of our brand or company.
2. We have to get positive criticism from the influencer towards our brand or product.
3. Another option is the insertion of an **advertisement**, more or less hidden, during the appearances (content) of these influencers.
4. We may also **invite** them to our product launches in order to promote them.

Influencer Campaign channel utilization

WHICH SOCIAL MEDIA CHANNELS ARE MOST IMPORTANT FOR INFLUENCER MARKETING?

(Select multiple)

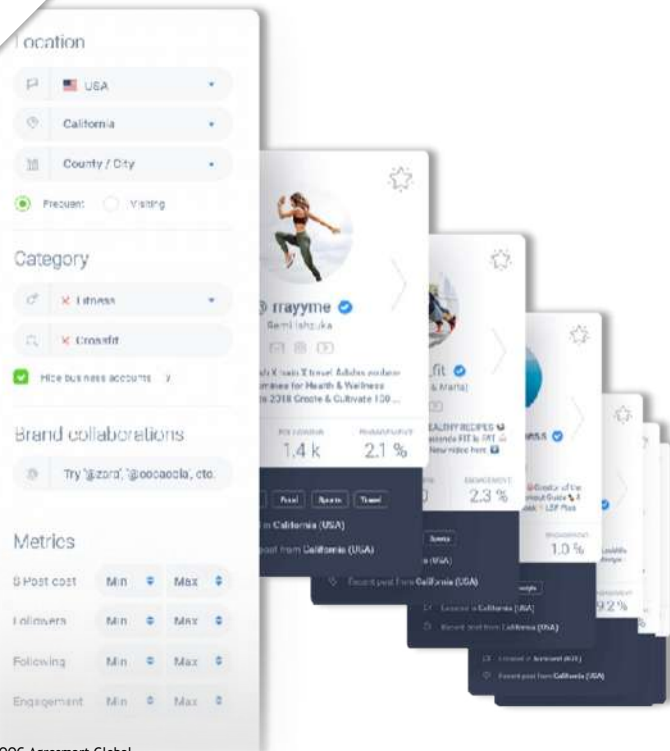

Substantial Growth in Influencer Campaigns in Q4 2020

heepsy

Heepsy is a website that facilitates the search for influencers for companies that request their services to give visibility to their products and activities. It has more than 3 million distinguished influencers in more than 40 categories.

WHICH IS ITS GOAL?

Heepsy

It consists of searching for a series of filters, according to the needs of each company. Heepsy shows Instagram users who have more than 5,000 followers and a public profile. You can filter by different categories and location. In this way, the company will find the influencer that best suits its product or service, according to its identity, tastes and target audience.

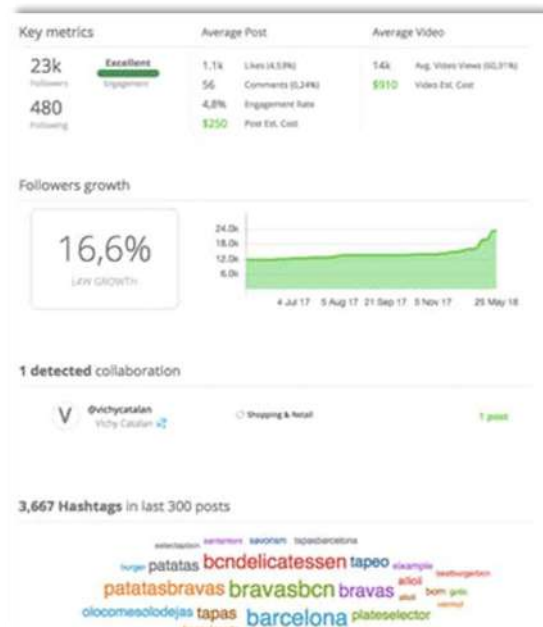

The screenshot displays the Heepsy search interface. On the left, a sidebar contains filters for 'Handle & Bio Search', 'Location' (Country, State, County/city), 'Category', and 'Brand collaborations'. The main area shows '3,374,417 results found' and a list of three influencers:

| Influencer | Followers | Following | Engagement |
|--|-----------|-----------|------------|
| ashikhmina Lena Ashikhmina Model @LA Models. Muse NYC. Работаю моделью. Work, life and love are my passion. | 55k | 280 | Good |
| jaylifeandstyle JAY CAESAR Brand Consulting Fashion Photography Forbes 30 under 30 #goals | 170k | 3.6k | Average |
| alexandrajoner Alexandra Joner Artist & make up freak. Latest single - Kilimanjaro | 42k | 1.4k | Average |

Each profile includes a bio, a list of brand collaborations, and a location filter (e.g., 'Model' for ashikhmina, 'Entrepreneur' for jaylifeandstyle, 'Arts' for alexandrajoner).

Heepsy

HOW DOES IT WORK?

In addition to the search for influencers by filters, there is a qualitative data analysis section that controls the growth of followers over time and captures it in graphs for better visibility. Likewise, the data of the brands with which each user has worked is collected.

Heepsy

TOOLS

DISCOVER

It allows you to find the most suitable influencers for the needs of companies by applying different filters:

- category
- location
- followers
- engagement
- more filters

MY INFLUENCERS

Having applied the filters or not, the number of influencers that each user considers appropriate for their economic activity can be collected.

This information can be downloaded in different formats

There is the possibility of leaving comments to the influencer, leaving a rating and saving the information of each influencer.

PRICING

It divides the user's subscription possibilities into 4 sections:

- Free
- starter
- Plus
- Pro

Each one with different characteristics and limitations in the search for those influencers that best suit the interests of the company.

Heepsy

According to the number of followers, we can classify influencers as follows:

- **Micro-influencers:** between 5K and 15K.
- **Small influencers:** between 15K and 100K
- **Medium influencers:** between 100K and 250K
- **Great influencers:** 250K and 1M

BINFLUENCER'S SOLUTION

11

ANALYSIS

The audience analysis of the influencers is a differential value offered by Binfluencer. With this metric, brands can ensure that the audience of the influencer matches the target audience desired.

MARKETING ON FACEBOOK: INSTAGRAM ADS

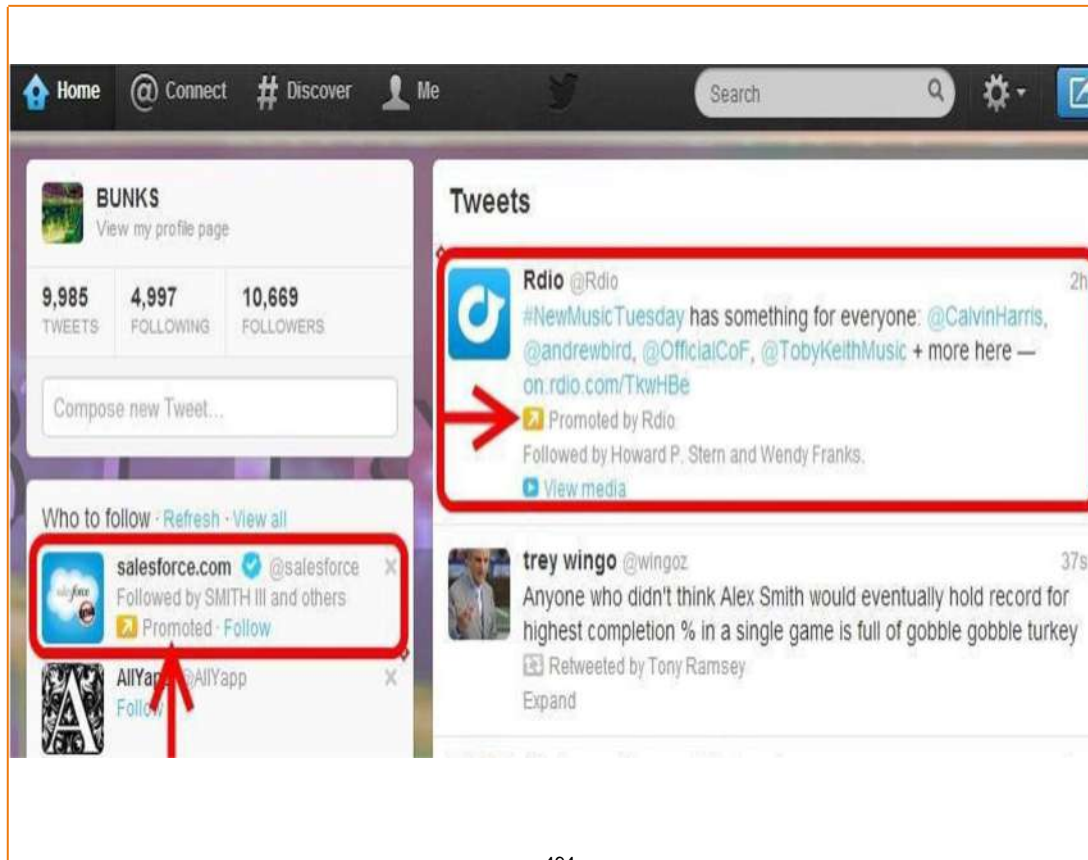

Within Instagram it is possible to measure the impact of the campaign through metrics:

- Engagement by followers.
- Post engagement.
- Reach engagement.
- Hashtags, volume of mentions.
- Number of users who have participated in the hashtag.
- Hashtags, interactions and impressions generated.
- Increase in followers, related to the potential reach of your content.
- Referral traffic; The clickable link in the bio.
- Best times to post.
- Share of social media, which allows you to know what your role is in the market with respect to the competition.

MARKETING ON FACEBOOK: INSTAGRAM ADS

WHAT IS A MARKETPLACE?

WHAT IS A MARKETPLACE?

As if it were an online shopping center, where we find multiple stores and people who sell their products and services.

- “A marketplace is a *“space”* that serves as contact between bidders and applicants, normally for a **commercial** purpose and always in exchange for a fee or service commission”
- “In exchange for that fee and/or **commission**, the marketplace provides **technology** (platform) on the one hand and **marketing** (users) on the other”
- We can find a marketplace for **products** (Amazon) or **services** (Upwork) for the final consumer (eBay) or for **companies** (Alibaba.com) there are **horizontal** (Rakuten) or **vertical** (Mumumio in food, Westwing in decoration)

ADVANTAGES AND DISADVANTAGES OF A MARKETPLACE

PROS

- ✓ Have more traffic & audience engagement.
- ✓ Take less financial risk.
- ✓ Don't run inventory.
- ✓ Quick to set up.
- ✓ Have low or no costs upon set up.

CONS

- ✗ Compete among competitors.
- ✗ Lack of brand awareness.
- ✗ Can't build a customer list for marketing strategy.

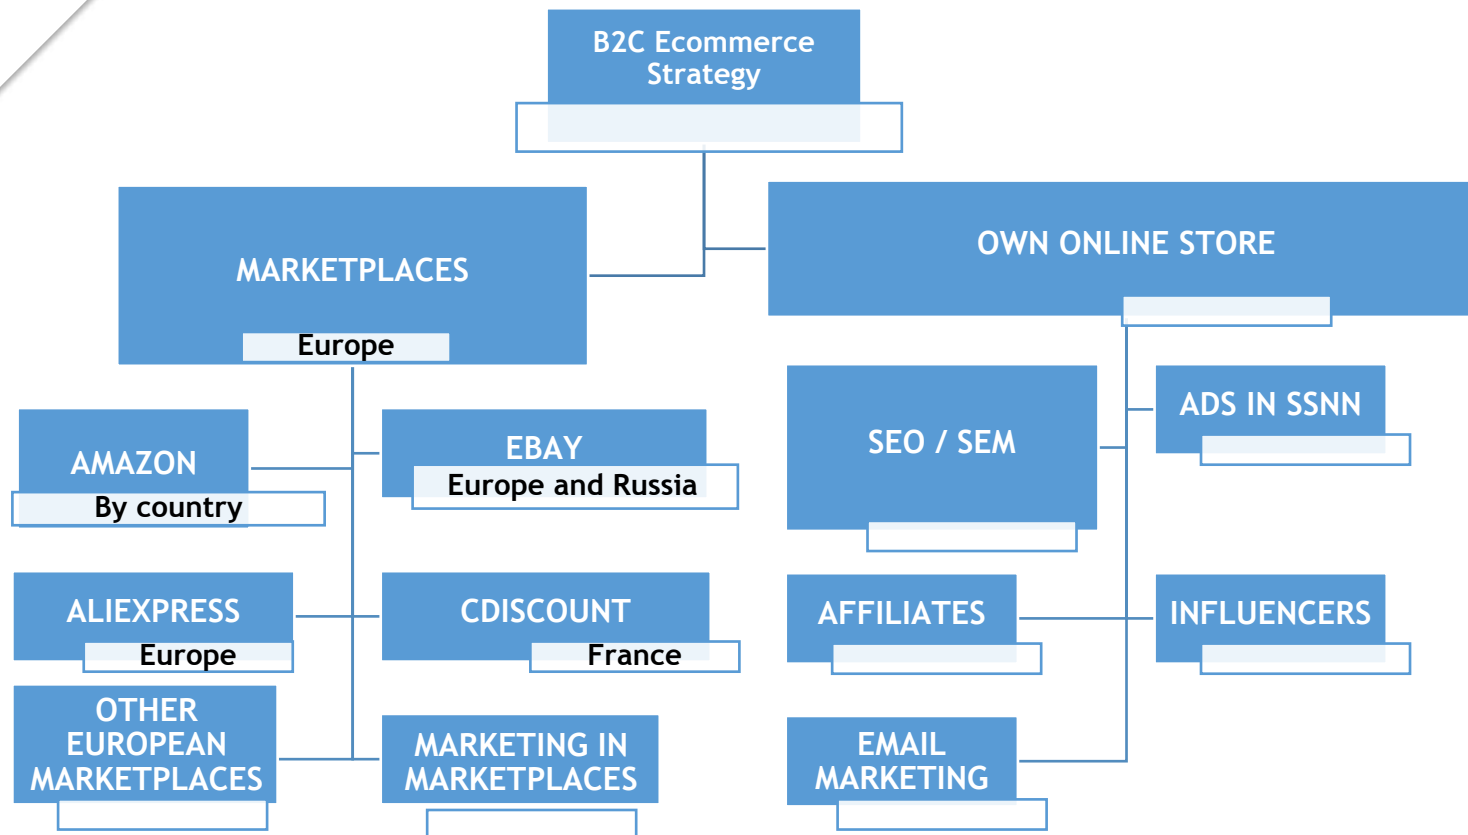

**Selling on
Online
Marketplace**

- Cheap access to new business opportunities.
- Showcase for the offer of your products and services.
- Possibility of testing international markets at low cost.
- Market information about the competition.
- Low cost branding (International visibility)
- In many B2C, fraud management (Amazon)
- Value-added services (Amazon... hosting services, logistics, payments...)

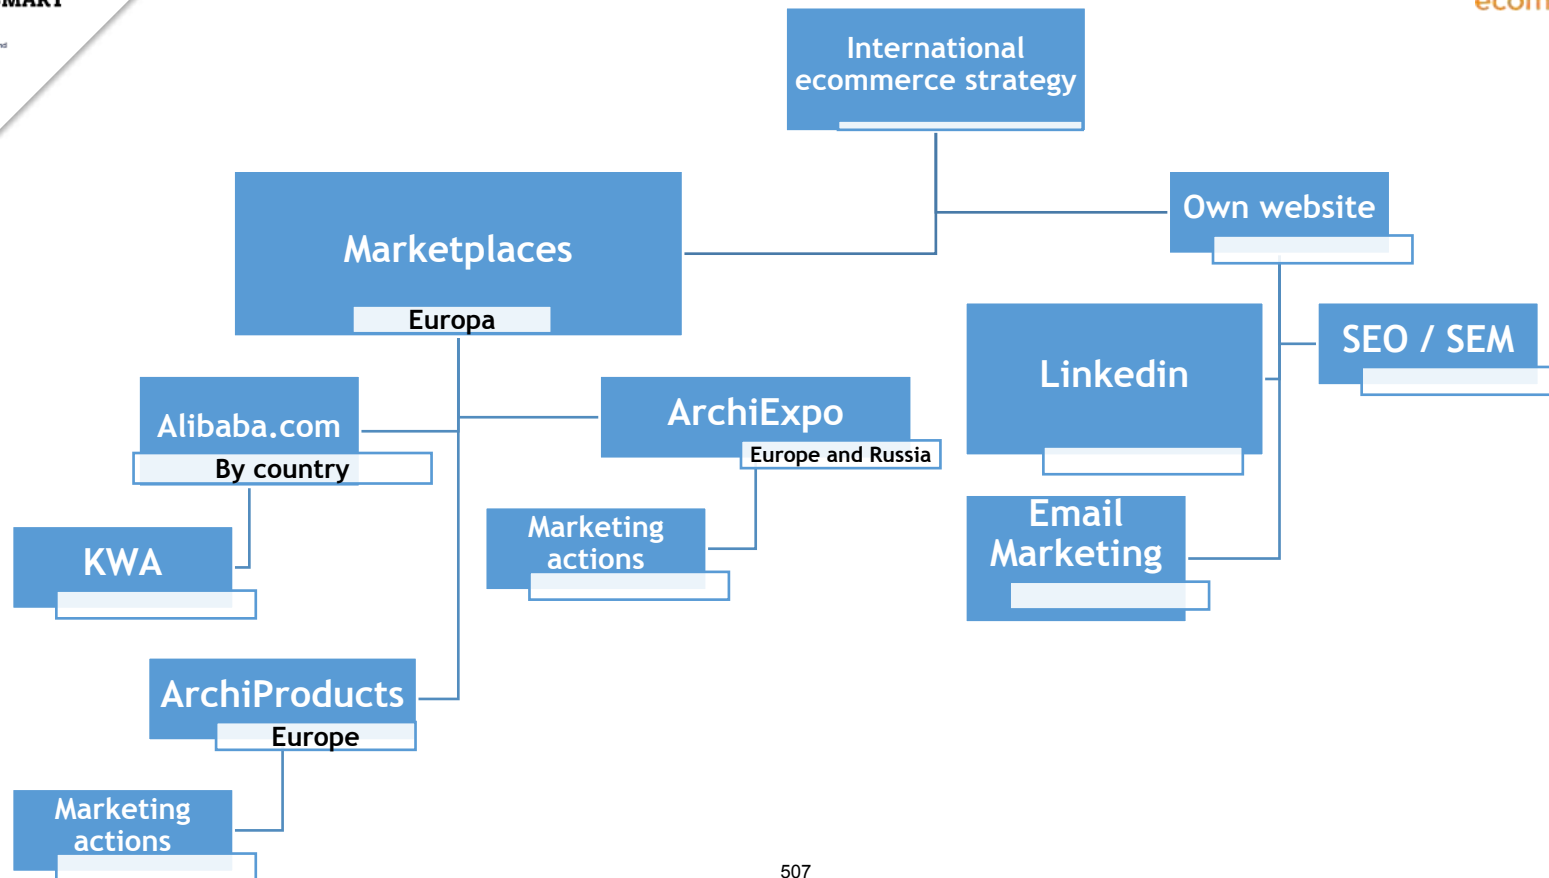

Promotion of the online store: digital marketing

Both Taobao and Tmall have diverse marketing tools. For example, Zhitongche, which is commonly used for attract and generate traffic to the store. In addition, there are other tools that allows you to participate in all the different marketing campaigns inside the platform or add a live streaming, among others.

Live streaming is not only used on Chinese social media, it is also hugely changing the way Chinese consumers buy. In these years, Taobao and Duoyin live streaming have increased the majority of online sales of products that use them. It is the biggest change in ecommerce in the Chinese market in recent years.

Austin Li and Viya are two of the people who are always at the top of the ranking of online sellers in China. At the online festival 6.18, which is the mid-year sale, Austin Li sold 200 million RMB (about 26 million euros) worth of goods in a single night.

To break into the Chinese market, Pascual chose to work with live streamer Austin Li. He tried Pascual's yogurts and said they taste better than other brands.

Thanks to this, people began to know their brand and search for information on social networks, while sales increased in their official store on Tmall and Taobao.

This is the biggest selling website in China and mainly for wholesale and from manufacturers. It is the best commercial option of the B2B type to reach the Chinese consumer.

After Taobao and Tmall, JD is the second B2C marketplace with the most consumers in China.

A new JD platform called JingXi has recently been added. It is similar to Pinduoduo, that is, it is used for group purchases.

You can also connect with WeChat, which is the most used app by people on a daily basis. The strategy of this platform is to connect social networks with the marketplace, so the marketing of this platform depends on WeChat KOL accounts.

Customers in more than 100 countries and regions.

It participates in the organization and cooperation with more than 100 professional imported food exhibitions in China and abroad:

Canton Fair, National Sugar and Wine Fair, SIAL (France), FHC (UK), SEOUL FOOD (South Korea), HOFEX (HK), Anuga (Germany), etc.

Chinese marketplaces and their forms of marketing

Chinese B2B platform specialized in wine.
